

Mines of the County

J. A. Chestnut, who has been at the Riverside mines, near Parker, arrived in Kingman yesterday and went on to Chloride. He reports matters going along all right at the mines. Mr. Chestnut is heavily interested in the mines of this county and is a firm believer in their ability to make good.

Al Nance, owner of valuable mining property in the Union Pass section, arrived from his home in Colorado Springs last week and is at the mines. Interested with him in the properties are several Colorado mining men and it is the intention to bring the mines to the productive stage. Mr. Nance will remain for some time at the mines.

L. Hoffman, general manager of the Arizona Southwestern Copper company, came up from the mines a few days ago and reports that a large part of the machinery for the new mill has been hauled out to the mines and that within three months the mill will be in commission. A report was current in Kingman the past week that the mill had been completed, but he assured us that this was untrue. The mill is to have a capacity of 200 tons daily.

Thirty-five men are at work on the Mitchell, where the shaft is being sunk to the 500 level. The shaft is all in ore of high milling value, it being stated that a sample taken across the entire width showed in excess of \$100 gold to the ton. The Mitchell is one of the Leland group, but upon which little work was done by the old owners. When taken over by the Porter interests it was proposed that the work be done on this ground, and the diagnosis of the management appears to have been correct, and this is the place where all the good ore appears to have been concentrated. The mine is in charge of Joe Onetto, who did such good work on the Gold Road under Mr. Porter and Mr. Phillips and brought that property to its present high state of productiveness. Mr. Onetto is a believer in the Gold Road country and is banking on making the Leland-Mitchell group one of the greatest gold producers of that section.

Contractual Debts.

The Arizona legislature recently enacted a law making mining property, operated under lease, option or otherwise, responsible for the indebtedness for labor of all employees working upon the property. In a recent decision handed down by the supreme court of Wyoming a statute somewhat similar in import was declared unconstitutional. The statute under consideration required the owner to take from the contractor a bond for the payment of all debts for labor and materials, provisions or goods of any kind incurred in carrying on the work, or in default of such bond the property of the owner should be liable for debts contracted. The only feature lacking in the Arizona statute is the bond requirement, but holding the property of the owner liable for the debts. In consonance with this theory it would be impossible to fix a debt on one class of property, and not make the application of the law general. Taking the rule that a mine under lease is liable for the debts of the lessee, why would it not follow that a farm would also be liable for its lessee's debts, and so on ad infinitum. And then, what real protection would property owners have in the matter of leasehold if the lessee could fix a debt against his landlord's property. It would appear to us that the rule laid down by the Supreme Court of Wyoming will be generally followed.

Golconda Hoist House Burned.

Last Thursday night the shaft house at the Golconda mine was destroyed by fire from an unknown cause, but luckily only the shell of the building was consumed. The machinery was only slightly injured and two or three days will see the hoist again in commission. The mine is shipping a large amount of high grade zinc ore, and as the price is the highest in thirty-five years the management does not intend to allow the extraction of ore to lag. The mine is the only producer of zinc in the state, the ore being the richest taken from a western mine. Shipments are made to Oklahoma, the smelter paying practically for all the content of the ore. The ore carries gold, silver and lead values, as well as zinc.

Tom Reed Junior.

Reports come from the Tom Reed Junior mines, situated close in to the Tom Reed property at Oatman, that the main shaft has reached a depth of over 220 feet and that splendid values have been found. The shaft was sunk on the vein and from the surface to the present depth good mill ore was had. From Assessor F. L. Hunt we learn that the mine under the management of William Darland is proving up a bonanza. Mr. Hunt informed the MINER editor that he was told by men coming in from the district that the showing in this vein was good, and that some of the ore now being taken from the shaft ran well up in gold. The company is well financed and is doing good work. It appears to be the plan to drift at the 250 level and open the vein. At the present depth the vein is harder and the values are better disseminated than on the levels above. Some of the ore shows free gold, while all of it shows well in the pan.

A Splendid Property.

F. T. Powell, who has a bond on the Iowa group of mines, near old Vivian, passed through Kingman Monday last on his way to the Coast. He was wearing a broad smile and inquiry lead to the information that a great strike of ore had been made in the Iowa at a depth of 240 feet. At that depth the ore body has filled the shaft and it is understood carries values of from \$100 to \$200 to the ton in gold. The other ore bodies opened in the drift on the 200 level assures the mine as one of the big things of the district. The work of sinking 100 feet below the 200 has been let to John H. Moore and others and they are rushing work as soon as possible. It is expected that at least 200 feet more will be sunk on the mine as soon as the present contract has been completed. The mine is said to be one of the best showings in the whole district and the striking of the rich ore body has caused all concerned in the property to wear smiles. County Assessor F. L. Hunt is one of the lucky owners, while John H. Moore and Ed. Roberts are also owners.

The MINER has a plat of the mines of the Gold Road and Tom Reed section and will soon issue an edition devoted to that part of the county. The plat was made by County Surveyor H. G. Schader and shows practically all of the important mines of that section. It does not take in the north part of Silver Creek, but reaches out as far as the Neglected group and the mines of the Hercules company. Later it is the intention to add all the other properties and bring the plat down to date. The Gold Road and Tom Reed mines have made history for the San Francisco district and Mohave county, but there are many other mines that will add greatly to the interest aroused in mining by these great mines. The damper that was put on the mines of the Tom Reed section by the geological report of the government has been dispelled by the later work done in the camp and the people that were ready to condemn are now hustling to get something in that section. The proof that the mines carry values below the contact with the older adesite is ample, the Tom Reed getting its best ores below that point and the same is true of the Boundary Cone, the Mitchell, the Iowa and many others that have been sunk below the contact. Some of the richest and most continuous ore bodies in that district are those below the zone of contact.

J. C. Kenwell has been engaged as principal of the Kingman school, and the Misses Gertie Potts, Alta Hubbs, Zoa Watkins and Miss Deming, subordinate teachers. The trustees purpose renting a room in the town for the kindergarten class, the school now being overcrowded.

They Put an End to it.

Charles Sable, 30 Cook St., Rochester, N. Y. says he recommends Foley Kidney Pills at every opportunity because they gave him prompt relief from a bad case of kidney trouble that had long bothered him. Such a recommendation, coming from Mr. Sable, is direct and convincing evidence of the great curative qualities of Foley Kidney Pills. The genuine Foley Kidney Pills are never sold in bulk, but put up in sealed bottles, enclosed in a yellow carton. Ask for Foley Kidney Pills. Refuse substitutes. H. H. Watkins, Druggist.

Hill City Excited

Over 80,000\$ Ore.

There is excitement in the Hill City district over the recent strike in the Golden Summit mine, according to the stories that are being brought to Deadwood it is about the richest thing ever opened in the Black Hills, and if it happened in any other place on earth would cause a stampede of a sensational character. As it is, very little is heard about it and the owners of the property are quietly taking out the rock and sacking it for shipment.

The rich ore is said to assay 40\$ a pound, or 80,000\$ per ton. The specimens are the finest ever taken out of a mine in the Black Hills and the streak is holding out well. The rich stuff is in a seam two inches wide, enclosed in a vein of good grade ore 18 inches wide. They have taken out 10 sacks and that already mined and in sight is said to be worth 75,000\$. The ground is owned by Del Canfield and associates, who secured it on a judgment some time ago. It has always been favorably regarded, and on former occasions has given up some very rich rock. It has passed through a number of hands since it was first worked by Bob Florman 30 years ago. —Deadwood Pioneer-Times.

E. S. Osborne, one of the big mine owners of the Parker section, is in Kingman awaiting the arrival of a mining man. Mr. Osborne and his family at one time resided in Kingman and is well known to the business men of the town. He is one of the best rustlers in the State and we believe he should again enter the county and take a change in the mines. This county is one of the best all the year place for mining, there being no other like it in the whole State, and it is a fact that here the mine owner gets his greatest reward in proven mines.

A Card.

This is to certify that Foley's Honey and Tar Compound does not contain any opiates, any habit forming drugs, or any ingredients that could possibly harm its users. On the contrary, its great healing and soothing qualities make it a real remedy for coughs, colds and irritations of the throat, chest and lungs. H. L. Blomquist, Esdaile, Wis., says his wife considers Foley's Honey and Tar Compound the best cough cure on the market. "She has tried various kinds but Foley's gives the best result of all." The genuine is a yellow package. Ask for Foley's Honey and Tar Compound and accept no substitute. H. H. Watkins, Druggist.

Mine Warning Notice.

To Whom it May Concern: Notice is hereby given that the Rattan and Ruth mines and machinery thereon, situated in San Francisco mining district, Mohave County, Arizona, are being worked under lease and bond, and that neither the said mining claims, nor the machinery thereon, nor the undersigned owners thereof, will be liable or responsible for any labor or material furnished, or debt contracted, or injury sustained by any employer or employee in working or improving said property, and that no employer or employee is the agent of the owners for any purpose, and that all operatives engage in such service at their own risk, and that no debt or claim of debt is valid against said mining claims or property or the owners thereof. RATTAN MINING COMPANY, JOHN BOYLE, JR., Pres. Kingman, Arizona, Oct. 28, 1910. First publication Oct. 28.

Mrs. J. Arthur Daugherty, of Cartersville, Mo., a niece of Postmaster J. N. Cohenour, is visiting Kingman. Mrs. Daugherty will probably remain in Kingman a short time and then continue her way to the coast, where she will remain some time.

Mrs. Lela Love, wife of Wiley Love, a farmer living near Covena, Ga., says: "I have taken Foley Kidney Pills and find them to be all you claim for them. They gave me almost instant relief when my kidneys were sluggish and inactive. I cheerfully recommend them to all suffers from kidney troubles." Foley Kidney Pills are as carefully made and as scientifically compounded as any medicine your home doctor can give you. They act directly on the kidneys and bladder. For sale by H. H. Watkins, Pioneer Druggist.

Notice to Creditors.

In the Superior Court of Mohave County, State of Arizona.

In the matter of the estate of HOWARD W. KEMPER, deceased.

Notice is hereby given by the undersigned, Administrator of the estate of Howard W. Kemper, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them, with the necessary vouchers, within four months after the first publication of this notice, to the said Administrator at his office in the Beale Hotel, in Kingman, the same being the place for the transaction of the business of said estate, in said County of Mohave.

J. S. WITHERS,
Administrator of the Estate of
Howard W. Kemper, deceased.

Dated this 11th day of June, 1912.

John Sullivan departed to Los Angeles last Thursday with his daughter who was very ill.

The majority of the Rand mines are now in a strong position with regard to ore reserves, and, taking the aggregate reserve for the whole Rand at 100,000,000 tons, the ore blocked out is three years or more ahead of combined stamp mills.

WE HAVE SEVERAL PARTLY DEVELOPED GROUPS of mining claims, carrying values in gold, silver, copper, lead and molybdenum. One of the groups is situated in the most wonderfully mineralized parts of the great Walapai mining district, and has the greatest vein in the State running through 3,000 feet of the ground. The vein shows copper, lead, gold and silver wherever opened. Another group in Cedar district carries values in copper and molybdenite. Nine claims in the group. Veins outcrop in all claims and are large and well-defined. Development show massive ore bodies. Description and terms on application. Working bonds given. No cash payments. Apply to Smith & Sawyer, Kingman, Arizona
